Art Unit: 2879

1. Newly submitted claim 60 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: A product and a method of making it; and

Species II: A method of treating a patient with UV radiation.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is held generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant

Art Unit: 2879

must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 60, which is directed to species II, is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The Examiner noticed that a previous Patent Examiner did not realize that claim 60 was never presented originally. Claim 60 is directed to a newly presented invention and was never presented originally. The current Examiner however treats claim 60 as being the claim of a newly presented invention and accordingly withdraws from consideration without traverse. Nevertheless, the Examiner contacted attorney, Mr. Brice Faller on 11/24/2004 and

Art Unit: 2879

discussed the matter relating to claim 60. Mr. Faller authorized the Examiner to cancel claim 60 from the application.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claims

Claim 60 is cancelled

3. The following is an examiner's statement of reasons for allowance: withdrawal of prior art rejection of claims 31-35, 38-42 and 53-57 in view of amendment of independent claims 31 and 41 and applicant's persuasive arguments.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
